

“Fast and Built to Last”

Standard Unit

Narrow Unit

- **Efficiency Tool – Saving producers up to 15 minutes per load**
- **Meets Federal EPA Guidelines for handling chute wash water**
- **ROI of 3-5 months common with current customers**
- **Fastest and easiest system in the market**
- **Leaves “zero footprint” at customers site**
- **Built to last the life of the truck**
- **No pumps, hoses, buckets or valves to cause problems**
- **Improved safety – no buckets to carry and cleaner sites**

“Our customers can now see our environmental position in action and the system paid for itself very quickly. The city inspectors were extremely pleased” - Scott French, Owner of Las Animas Concrete, Santa Cruz, California.

*“The Chute Wash Recovery System gives us the quickest possible turn around times on our trucks. We constantly measure performance and this system was the most efficient.”
– Jason Stier, Asst. Mgr./ Dispatcher at River’s Edge Concrete, Belle Plaine, MN*

Real Savings, whether it's 3 minutes or 15 minutes of time saved with wash down it's real money to your bottom line. Time saved and speed of turnaround add up especially with the average cost per minute to operate a ready mix truck at \$1.00 - \$1.20 per minute. Depending on costs, a savings of 5 -7 minutes per load time reduction can equate to a savings in excess of \$1.00 per yard.

"We are committed to environmental stewardship and we saw the Chute Wash Recovery System as an opportunity to recover costs and boost revenue with environmental fees." Keith Minor, Owner - Metro Mix, Denver, CO

Optimizing Utilization, finding the additional time saving in site wash down can reduce total truck count needs and overtime. Being able to control the site wash down status no matter site condition provides quicker truck turnaround further improving your dispatch logistics. Site wash down time has been reduced to 3 minutes in some cases independent of job site conditions.

Customer Satisfaction, Drivers and producers who are currently using the system appreciate its ease of use and speed. Contractor customers who see it in use are appreciative for the service it provides, helping their site keep clean and free of wash water. Some customers are promoting their chute wash system as a service to their contractor customers to differentiate their offering. **Lease options available (\$30 - \$40 per month).**

"I have used other systems and this is the easiest system I have ever used and it is basically maintenance free" – Duane Klehr, driver at River's Edge Concrete

Easy to use

Step 1

Attach Chute

Step 2

Wash Down Chutes

Step 3

Discharge at plant
